

Pre-Report race 3 in Trier 2017 - „Renncenter Trier“

Less than one week to go for the grand final of the 3rd “LMP Pro Series” season in Trier. Again it was a great season with nice people, spectacular cars, and thrilling competition.

The official time schedule is valid and can be found on our homepage under “documents”. Nevertheless, at 8 p.m. all cars have to be ready in the parc ferme.

After material handout and warm-up the technical inspection follows. Please provide the filled out "technical inspection" sheet to quicken the technical inspection.

As mentioned in the FAQ, the DoSlot 27Shore rear wheels will be given out with a diameter of 27,3mm with a tolerance of +0,1mm.

All JK Retro Hawk motors are carefully pre-selected and are equal as possible. After the race, rear wheels and motors are property of the teams.

Following a short summary report from the free practise day on the 28th of october:

“Saturday 28.10 there was the official practice day for the final race of season 2017 in Trier.

The track was in good conditon, so the teams could start early with setup tests.

Slotracing Mülheim with Thomas and Hendrik was there for track learning. Laptimes from around 8.6s were possible.

The A-team with Desmond and Kevin want a bettet result then last year on this track. They tried a lot and were searching for more grip 8.6s.

GP-Slotracing confirmed again their fast speed of this season with 8.4s laptimes.

Sloefspeed showed with Raymond, Gregory and Dirk. The car worked fine. Laptimes from 8.4s were possible.

The local teams HoBS Racing, Dr. Slot and Jägerteam had a clubrace on another track in the big racecenter. They drove only a few laps. Yannick and Ralph were able to go 8.1s. Clearly they are prepared well and want a top three finish or victory in their home race.”

And now we are looking forward to see you all to the finals!

As usual, we run a facebook liveticker which can bee seen even without facebook account under: <https://www.facebook.com/lmpseriesliveticker>
